Some of my readers ask To run this script you have to install PHP apc library extension or for PHP 5.. rfc1867 = on php ini located in /etc/php ini get_progress php Contains PHP code it identifies file upload status from server process.. I am trying to implement an AJAX file upload feature in my project I am using jQuery for this; my code submits the data using AJAX.. I also want to implement a file upload progress bar Some days age I have created a post that deals with How we can upload file with progress bar using php and jQuery.

4 not required, just follow the steps to enable the extension For web page design we implemented with bootstrap CSS library for any information check my previous post Windows APC Installation Follow this link In php.. ini include apc rfc1867 = on Linuk APC Installation Follow this Link In php ini include apc.

## jquery multiple file upload with progress bar
